Embraer and Rheinmetall to establish multinational C-390 training hub in Bremen, Germany

BREMEN, October 28, 2026 – Embraer (NYSE: EMBJ; B3: EMBJ3) has entered into a definitive agreement with Rheinmetall to establish a multinational training center in Bremen for Embraer's C-390 Millennium, the next generation of military airlift with multi-mission capability. This builds upon the landmark Memorandum of Understanding (MoU) signed on June 6, 2024, in Düsseldorf, which established the foundation for deeper industrial and technological collaboration.

The training hub intends to enable air forces across Europe to utilize its modern, high-fidelity training facilities. This new center will provide aircrew and cargo-operations training, including a Full Flight Simulator (FFS) and a Cargo Handling Station Trainer (CHST) developed in partnership with Rheinmetall. The FFS provides highly immersive training under simulated normal, abnormal and emergency conditions, and is designed to achieve Level D qualification. Using realistic visualization technology, the CHST enables comprehensive training in loadmaster procedures and cargo operations.

"Today's announcement reinforces Embraer's long-term commitment to operational excellence and mission readiness. The new center will give existing and future European C-390 operators greater access to training, supporting their long-term operational readiness," said Carlos Naufel, President and CEO of Embraer Services and Support.

"As part of our ongoing relationship with Embraer, this collaboration addresses growing demand and strengthens European defense training infrastructure. The facility will build upon Rheinmetall's well-established training operations in Bremen and is intended to serve as a base for European customers," said Timo Haas, CEO of Rheinmetall's Digital Systems Division.

The companies expect the training hub to be operational by the second half of 2028.

About Embraer

Embraer is a global aerospace company headquartered in Brazil. It manufactures aircraft for Commercial and Executive aviation, Defense & Security, and Agricultural customers. The company also provides after-sales services & support through a worldwide network of wholly owned entities and authorized agents. Since it was founded in 1969, Embraer has delivered more than 9,000 aircraft. On average, about every 10 seconds, an aircraft manufactured by Embraer takes off somewhere worldwide, transporting more than 150 million passengers a year. Embraer is the leading manufacturer of commercial jets with up to 150 seats and is the leading exporter of high-value-added goods in Brazil. The company maintains industrial units, offices, service and parts distribution centers across the Americas, Africa, Asia, and Europe. Embraer's APAC headquarters is in Singapore, and its China headquarters is in Beijing.

About Rheinmetall

As an integrated technology group, the listed company Rheinmetall AG, headquartered in Düsseldorf, stands for a company that is as strong in substance as it is successful internationally, and that is active in various markets with an innovative range of products and services, including flight simulation and training. Rheinmetall is a leading international systems supplier in the defense industry and at the same time a driver of forward-looking technological and industrial innovations in the civilian markets.
