INDEPENDENT SPECULATIVE PROJECT - FOR PORTFOLIO PURPOSES ONLY

Embraer
3h ·

#NEWS | Embraer today announced that it has entered into a definitive agreement with **Rheinmetall** to establish a multinational training center in Bremen, Germany for Embraer's C-390 Millennium. The new facility aims to provide existing and future European C-390 operators with greater access to training, supporting long-term operational readiness. It will include high-fidelity training technologies for aircrew and cargo operators, including a Full Flight Simulator (FFS) and a Cargo Handling Station Trainer (CHST), developed in partnership with Rheinmetall. The companies expect the training hub to be operational by the second half of 2028.
